The theme of this screensaver is blue and it is suitable for both men and women. The screensaver also has a pleasant background music. It's a very easy screensaver to set up. There is no need to install or download anything, and you don't even have to log in to a website. You can browse and install the screensaver without even leaving the computer. Don't miss this exciting screen saver and get yours now. The experience is then available to you, and the new Wave Charts indicate the contours of the sea waves. This version features a number of new starfish and sea urchins. There are three layout for switching between, so you can decide which is more suitable for you. This version comes with lots of underwater images. The default sound file starts automatically. Screensaver functionality is very simple - when you start the screensaver, you automatically gain access to a small organizer. There, you can sort and view your photos. However, you can also hide the organizer and place the photos of your choice on the front page. The third and last version of this free screensaver comes with a crystal clear sun rising over the sky, with sunny patches in the clouds, a clear blue sky, and a grey color for the rest. You have the option of adding background music to the screensaver. Also, you can change the time interval and the transition rate. How do you uninstall Underwater World Free Screensaver? 1. The steps are quite simple. Start the Underwater World Free Screensaver program. 2. The main window appears, and the setup is completed. 3. Click the red "X" button. The present invention relates to an optical recording medium having a high recording density, a compact apparatus for and method of reproducing data from the same, and a computer-readable record medium storing program for accomplishing the method. Optical recording media have been used to advantage in the past as means for reading information out therefrom and for recording information thereto. Typical among these optical recording media are those of the magneto-optic, phase-change, and change in reflectivity type. A light source such as a laser diode, used in the data read or write operation, is required for converting an optical input signal
