The Mycobacterium tuberculosis (MTB) test(MGIT 960), in which liquid growth media is used, was evaluated in the laboratory to determine its sensitivity. In this study, we used Middlebrook 7H10 solid media supplemented with

oleic acid-albumin-dextrose-catalase and Middlebrook 7H9-albumin-dextrose-catalase liquid media to compare the growth rates of MTB. The sample size was determined using a paired t-test. We found that the microorganism grew slower in the liquid medium. The growth rate in the liquid medium was 1.06 (95% confidence interval, 1.01-1.11) fold lower than in the solid medium. The difference was statistically significant (p < 2e-16). There are lots of questions that
